On rainy days, you bring me sunshine
Your friendship shines through every cloud
You make every gloomy day seem fine
Pursuing dreams that make us proud

Sending email jokes, following the latest craze
When we're together we laugh so easily
Finding fun in our own special way
My best friend, you're always there for me

My good times are your good times
Your good times are my good times
Our good times are the best of times
When it's us against the world

That's what friends are for

Through the worst and the best of times

I do for you what you do for me

Alerting me to the warning signs

Of looming danger I can't see

My good times are your good times

Your good times are my good times

Our good times are the best of times

When it's us against the world

That's what friends are for

I don't know where I'd be without you

You stick to me just like my favorite glue

Through all of the crazy things we do

You keep my trust, and you are true

On rainy days, you bring me sunshine

Your friendship shines through every cloud

You make every gloomy day seem fine

Pursuing dreams that make us proud

My good times are your good times

Your good times are my good times

Our good times are the best of times

When it's us against the world

That's what friends are for

My good times are your good times

Your good times are my good times

Our good times are the best of times

When it's us against the world

That's what friends are for

When Charlie saw her, he knew he couldn't resist

The light that shone from her eyes

And when Bernadette saw him walking across the room

She wondered, am I dreaming or is this real?

Two strangers in a crowd, reached out for each other

Two people looking for someone to hold and kiss

Two lovers in the night, under a moonlit sky

Two strangers wiped their tears and said goodbye

So Bernadette asked him to stick around
And soon the days turned into months
And Charlie just couldn't believe his luck
She was everything he could hope for
Two strangers in a crowd, reached out for each other
Two people looking for someone to hold and kiss
Two lovers in the night, under a moonlit sky
Two strangers wiped their tears and said goodbye
Then one day their world fell to pieces
Bernadette found the emails from Madrid
Charlie just couldn't believe it was over
But Bernadette could never forgive
Two strangers in a crowd, reached out for each other
Two people looking for someone to hold and kiss
Two lovers in the night, under a moonlit sky
Two strangers wiped their tears and said goodbye
When Charlie saw her, he knew he couldn't resist
The light that shone from her eyes
And when Angelina saw him walking across the room
She wondered, am I dreaming or is this real?

My favorite place to hang out with my friends is Shibuya in Tokyo. Shibuya is a center for youth fashion and a culture, so it's a place where my friends and I can keep up with the latest trends. You have probably seen the famous Shibuya crosswalk in movies or the TV. It's a giant pedestrian crossing that thousands of people cross every day. It's a great place to take pictures with friends. We really love to hang out in Shibuya because it is one of Tokyo's most colorful and busy areas.

My friends and I like to hang out at a place called 50 Moganshan Road in Shanghai. It is a contemporary art district that contains the work of hundreds of artists' studios. 50 Moganshan Road, or M50 as we call it, is a really fun place to hang out. It's really interesting because you can

find art of all kinds there. There are also many hip cafes in the area. My friends and I usually check out some art and then go for a coffee and chat. It's super fun!

If you come to Bangkok, you will find my friends and I hanging out in Thonglor, one of the trendiest areas in the city. During the day, we love to shop at a mall called Seenspace. There are many nice shops and famous restaurants to enjoy there. When night falls, Thonglor comes to life, with an amazing collection of nightclubs and bars. Our favorite club is called Desi Beats, and club with Moroccan décor and a beautiful outdoor area.
